*areas of use*

*care instructions*

Vacuum your rug regularly as shedding of loose fibres will occur with a new rug (do not use a rotating or brush head on the vacuum cleaner).

Promptly clean spills by blotting with a clean, undyed cloth. Do not dry clean or use harsh chemicals that could damage or fade your rug. Never fold your rug for storage or keep in an airtight bag. Avoid direct or continuous exposure to sunlight and rotate your rug to promote even wear. Professional cleaning is recommended on occasion to ensure the long life of your rug.

*manufacturing variations*

**Size** - Can vary by +/- 3%.

**Colour** - Rugs are primarily made from natural and undyed fibres. Every effort is made to ensure there is minimal colour variation however some variation can be expected. Jute exhibits nuances in shading that enhance its natural beauty, resulting in gentle linear variations when it is overdye to achieve depth in colour. The pile has a clear, one-way direction that refracts the light beautifully, causing the colour to change subtly when viewed from different angles.

**Shedding** - Natural fibre rugs will initially shed loose fibres, which can be hastened by regular vacuuming.

**Pop-ups** - Due to the nature of weaving, there will be short fibres popping up while the rug settles. These can be trimmed.
